County Maps Mason WV Huntington CP.jpg
Mason County Fact Sheet December 2013.doc

Hi Dennis,

Yes, Deb is coming down for the meeting. Right now for the Huntington/Central WV Subarea START just got the revised TDD because the one that Mike had expired in December 2013. So right now we just have a very preliminary draft done following the same layout as Deb and Raj's subarea plans. The one difference is Huntington will not have a GRP in this first version due to time restraints. The due date I put in the TDD for START was April 11, 2014 for a draft that can be circulated out to a workgroup (I assume would be USCG, WVDEP). The draft plan will include all the completed county fact sheets which will have a large map on the back. An example of fact sheet and map are attached to this email.

If you have other questions, let me know.

Thanks,

Melissa

Melissa, hi

Could you send me an brief update on our sub area plan? You are definitely more in tune with the progress of it than I. I am meeting with the CG and EPA tomorrow regarding all the other crap floating out there. Not sure but maybe Deb is coming down if she got travel approval. I did not exclude you. I think we need to eliminate some of this redundancy of plans. We also did not ask START to be there. So much stuff was started long ago that really needs to be eliminated.

Anyway, thx

dennis
